

## SEMINAR:

## International Convention Centre (ICC) Site Visit

Wednesday, August 28

Join AIRAH NSW for a site visit that includes a behind-the-scenes look at the International Convention Centre (ICC) in Darling Harbour.

Design from the ground up incorporates some of the latest technology and connectivity; the ICC is in fact one of the most technologically advanced buildings in the world.

Johnson Controls has contributed a critical role in the ICC's operational success, and will provide an insight into how the firm's contribution helped create this innovative building.

The ICC site visit will allow attendees to access some of the plant rooms. It will also showcase some of the unique features that help make the ICC an iconic Sydney building and a top-drawer convention facility.

Refreshments will be provided at registration on the night.

To be part of this site visit, please register your attendance today.

*NB: Visit may vary slightly depending on access on the day.*

International Convention Centre, Sydney
