CELEBRATING
100 YEARS IN 2020

ANNUAL AIRAH WA MEMBERS' LUNCH:

The Square Kilometre Array - a global project to build the world's largest and most sensitive radio telescope here in WA Thursday, September 19

Join AIRAH's WA division for the annual WA Members' Lunch featuring a presentation on "the Square Kilometre Array – a global project to build the world's largest and most sensitive radio telescope here in WA".

Aurecon Associate Shandip Abeywickrema will provide some background on this billion-dollar multinational science project to build the world's largest and most sensitive radio telescope, which will be located in Western Australia. He will discuss the engineering and project management challenges faced in the infrastructure design, with key considerations identified such as modularisation, construction in a remote area, building design and interfaces with global stakeholders.

Having started his career with Aurecon 14 years ago, Shandip is a chartered mechanical engineer. His project experience has allowed him to develop significant skills in leading multi-disciplinary design teams. Shandip is the lead engineer on the infrastructure components of the Square Kilometre Array in Australia. The infrastructure provision covers everything from roads and tracks, to fibre and power distribution, communications, monitoring and buildings (including the design of a radio-quiet supercomputing facility).

This lunch will include a two-course meal, beverage package and opportunity to network with over 100 industry representatives.

Shandip Abeywickrema, Associate, Aurecon
