

What is NEBB?

- NEBB provide tangible proof of competences in HVAC Companies and Individuals
- Recognised around the globe
- Multiple Disciplines

NEBB's Role in the Industry

- Utilise detailed commissioning procedural standards
- Correctly commissioned buildings operate at between 10% - 30% more efficient
- Collaborate with owners, consultants, builders and FM staff to tune new buildings
- Review existing building performance and highlight operational issues

NEBB Disciplines

- Testing, adjusting and balancing (TAB) of air and hydronic systems
- Cleanroom performance testing
- Building system commissioning
- Retro commissioning
- Fumehood testing
- Building envelope testing
- Sound and vibration testing

NEBB Certification

- Working to NEBB standards does not meet the NEBB certification requirements
- NEBB certification provides the building owner conformation that the project data is true and correct
- Company and individual certification depend on true and correct data

NEBB TAB Certification

- Principal qualification specified
- NEBB (TAB) Professional qualification at Associate Degree level
- Equipment must be owned and calibrated annually
- CPD program employed to ensure currency
- Equipment and CPD audited bi-annually

NEBB and Green Star

- NEBB now forms a suitable commissioning process under MAN-2
- NEBB is detail orientated and fits in well with CIBSE and ASHRAE's broader framework

Thank You
