# ARBS 2016

It only comes around once every two years, but ARBS is without a doubt the biggest event on the air conditioning, refrigeration and building services calendar. Here's a preview of what to expect in 2016.

Submissions are received in areas such as:

- Case studies and real-world applications
- Future technologies
- Innovation
- War stories – what went wrong and lessons learnt
- Hot industry issues
- Energy efficiency / green design
- Emerging trends in building design, and the impact for HVAC&R
- Regulatory and compliance issues
- Standards and rating tools
- Project and facility management
- Legal and risk management

## HONOURING THE INDUSTRY'S BEST

Running since 2010, the ARBS Industry Awards recognises the outstanding achievements and excellence in Australia's HVAC, refrigeration and building services industries across a range of areas including Young Achiever, Product Excellence, Project Excellence, Industry Education and Training and the Hall of Fame.

Representing the highest honour in the HVAC&R Industry, the Awards Gala Dinner attracts all major players from every discipline and specialty of the industry sector.

A panel of industry experts will evaluate the nominations based on various criteria such as leadership, sustainability, performance and innovation, with the winners to be announced on March 18. ■

As Australia's largest dedicated air conditioning, refrigeration and building services exhibition, ARBS 2016 brings together the industry's most influential players – as well as all their newest gear and innovative tech.

To be held at the Melbourne Convention & Exhibition Centre from 17–19 May, this year's event will connect over 250 local, national and international manufacturers and suppliers with thousands of industry decision makers, specifiers, engineers, contractors and trade technicians.

While showcasing the latest HVAC&R products remains a big part of ARBS, perhaps more importantly, the three-day exhibition gives visitors and exhibitors alike the chance to catch up with colleagues and friends, and to extend industry networks.

## GET THE KNOW-HOW

Another key feature of ARBS has always been its extensive seminar program. Providing industry gurus with an opportunity to share expertise, innovations and best-practice, the seminar program not only provides those in attendance with leading-edge education, but also extensive networking opportunities.

Registrations for the 2016 seminar program are now open. The formats will include seminars, panel session or workshop, and are between 30 and 90 minutes in duration.
