

Russell Evans

Russell is Victorian/Tasmanian manager of AECOM's Applied Research and Sustainability group. He is a member of AIRAH as well as a committee member of AIRAH's ESD Specialist Technical Group. Russell has worked both locally and internationally as a building services and sustainability engineer where he has applied practical and innovative sustainable design solutions to the built environment. His most recent work includes the upgrade of 120 Collins Street and the redevelopment of the AIA's 41 Exhibition Street.

With 12 years of building services consultancy experience working across all sectors of the built environment the knowledge gained from this experience has enabled Russell to bring forth AECOM's philosophy of continuously challenging prescriptive built environment benchmarks whilst applying research on all projects that lead to enhancing our client's objectives of delivering first class facilities.
