

## **Bio for Alan Pears**

### **Adjunct Professor at RMIT University and Co-Director of Sustainable Solutions**

Alan Pears is one of Australia's most awarded energy efficiency specialists. On top of his Order of Australia and WME Magazine carbon leader award, he has just received the Australian Association for Saving Energy's inaugural energy efficiency award. He has helped to develop policy (including building energy regulation), programs (including the predecessor of NABERS, energy labelling and the Energy Efficiency Opportunities program for big industry), and he works on real projects such as design of green appliances, web calculators and environmental input to green buildings including the 60L Green Building, which is the topic of his case study tonight.
